

We Simplify Professional Flow Measurement

PROFESSIONAL PORTABLE ELECTROMAGNETIC FLOW MEASUREMENT

ACCURATE

Single and dual axis measurement for true velocity regardless of probe rotation.

RELIABLE

Electromagnetic technology with no moving parts. Built for the field.

VERSATILE

Open channels, pipes, manholes, stormwater, and more.

CONNECTED

Realtime data to your mobile device with Flo-View software.

— REPRESENTATIVE INQUIRIES WELCOME —

ACCURATE. RELIABLE. BUILT FOR THE REAL WORLD.

Aqua Magnetics instruments deliver professional flow measurement solutions designed for accuracy, simplicity, and confidence in the field.

FLO-DETECTOR

DUAL AXIS FLOWMETER

Dual axis measurement
(X & Y)

Accurate regardless of
probe rotation

Measures net forward
velocity

Surface Velocity measurement ideal for
normal and ultra low
flow conditions

Advanced vector
processing

Best choice for the most
accurate data

FLO-PRO

SINGLE AXIS FLOWMETER

Single axis (X) velocity
measurement

Submerges directly
into the flow

Smartphone via Wi-Fi
- no dedicated
readout needed

Cost effective
professional solution

Easy to deploy and
operate

Great for typical
flow conditions

APPLICATIONS

**PARKING LOT
RUNOFF**

**URBAN
FLOODING**

**WASTEWATER
SYSTEMS**

**OPEN CHANNEL
STREAMS**

**MUNICIPALITIES
& ENGINEERS**

DESIGNED MANUFACTURED CALIBRATED
